

## **Nextwave Media Pvt. Ltd.**

Nextwave Media has developed an application called Comics Head, that enables users to tell stories, share their experiences, comment on issues that affect them and talk to friends about places they have visited. The application allows them to do this with ease, in a visually compelling format such as comics, photo comics, storyboards, photo journals and business presentation slides.

Available for the Apple iPad, Symbian and S60, Blackberry Playbook and PCs and laptop platforms, Comics Head is a user-friendly, self-publishing tool that helps users instantly create visually interesting content, on-the-go. The user can start quickly by choosing from the app's pre-defined templates and inbuilt art assets. It is now possible for people to go viral with their ideas by sharing them on Facebook, Twitter, Tumblr and e-mail.
